Food Industrial Scope

Project Title

SAP S/4HANA Material Management Implementation for Food Industrial Company

Module: SAP S/4HANA MM Consultant

1. Executive Summary

This project demonstrates the implementation and configuration of SAP S/4HANA Material Management (MM) module for a food industrial company. The project covers the complete Procure-to-Pay (P2P) cycle including purchasing, inventory management, material master setup, pricing procedure, release strategy, subcontracting process, and inventory transactions.

The company operates with one headquarters and one manufacturing plant responsible for procurement, inventory handling, and production-related purchasing activities.

The project focuses on:

- Enterprise Structure Configuration
 - Material Master Configuration
 - Procurement Process
 - Purchase Requisition and Purchase Order Cycle
 - Release Strategies
 - Pricing Procedure
 - Inventory Management
 - Subcontracting Process
 - MRP Planning
 - Testing Scenarios
-

2. Project Objective

The objective of this project is to configure and test SAP S/4HANA MM module for a food manufacturing company in order to automate and optimize procurement and inventory management processes.

Main objectives:

- Configure enterprise structure
 - Configure procurement process
 - Create purchasing document types
 - Configure release strategies for PR and PO
 - Configure pricing procedure
 - Implement inventory management process
 - Test end-to-end procurement cycle
 - Configure subcontracting scenario
 - Perform material planning using MRP (Manual Reorder Point)
-

3. Project Scope

Included Scope

- Material Management Configuration
- Procurement Configuration
- Inventory Management
- Purchasing Configuration
- Release Strategy
- Pricing Procedure
- MRP Planning
- Vendor Master
- Material Master
- Goods Receipt
- Subcontracting Process

4. Business Requirement

The company is a food industrial organization with one headquarter and one production plant.

The company has:

- Local procurement department
- Foreign procurement department
- Non-Production warehouse
- Raw material warehouse
- Finished goods warehouse

Business requirements:

1. All purchase requisitions must be approved by the General Manager.
2. Local purchase orders must be approved by the Local Purchasing Manager.
3. Foreign purchase orders must be approved by the Foreign Purchasing Manager.
4. The company purchases raw materials, packaging materials, and non-production materials.
5. The company uses subcontracting process for packaging operations.
6. Materials must be stored in different storage locations.

5. Project Planning

Phase	Duration
Requirement Gathering	2 Days
Enterprise Structure Setup	1 Day
MM Configuration	4 Days
Master Data Creation	2 Days
Pricing Procedure Configuration	1 Day
Release Strategy Configuration	1 Day
Testing Scenarios	2 Days

Phase	Duration
Documentation	2 Days

6. Stakeholder Analysis

Stakeholder	Responsibility
General Manager	Approves Purchase Requisitions
Purchasing Manager	Approves Purchase Orders
Local Buyers	Local Procurement
Foreign Buyers	Foreign Procurement
Warehouse Team	Goods Receipt and Inventory Handling
SAP MM Consultant	System Configuration

7. Enterprise Structure

18. Database Design

Main SAP Objects

SAP Object	Description
Material Master	Material Information
Vendor Master	Supplier Information
Purchase Requisition	Internal Request
Purchase Order	Procurement Document
Material Document	Goods Movement

19. UI/UX Screens

The following SAP transactions were used and tested:

Transaction	Purpose
MM01	Create Material
BP	Create Vendor
ME51N	Create Purchase Requisition
ME54N	Release Purchase Requisition
ME21N	Create Purchase Order
ME29N	Release Purchase Order
MIGO	Goods Receipt
MMBE	Stock Overview
MD02	Run MRP

20. Challenges Faced

Challenge	Solution
Release strategy not triggering	Corrected characteristic values
Pricing schema issue	Updated schema determination
Material not appearing in MM60	Extended material to plant

21. Results and Benefits

The implementation achieved the following:

- Standardized procurement process
 - Controlled approval workflow
 - Automated inventory updates
 - Improved purchasing visibility
 - Accurate stock management
 - Efficient subcontracting process
 - Proper financial integration
-

22. Conclusion

This project successfully demonstrates SAP S/4HANA MM implementation for a food manufacturing company. The system supports complete procurement and inventory operations including local procurement, foreign procurement, subcontracting process, pricing procedures, release strategies, and inventory management.

The implemented solution improves operational efficiency, approval control, inventory accuracy, and procurement management.

23. Appendix

Important SAP T-Codes

T-Code	Description
SPRO	SAP Customizing
MM01	Create Material
BP	Create Vendor
ME51N	Create Purchase Requisition
ME21N	Create Purchase Order
MIGO	Goods Movement
OBYC	Automatic Account Determination
MD02	MRP Run
